SEN 202 – Security Incident Mapping (SIM)

Campus Security Questionnaire

Name: OLUWAGBEMI SEGUN IGNACIOUS

Matric No: 241201066

Department: Computer Science

Faculty: Computing

Level: 200

Session: 2nd Semester, 2025/2026

Google Forms Questionnaire Link

https://docs.google.com/forms/d/e/1FAIpQLSdQMMz9NAYE8B7HRYSRJlqtFXAUdmD6tsCCsv3VbZvK4oiO7w/viewform?usp=dialog

This questionnaire is designed to gather information about security concerns and incident reporting within the campus community. The information will support the academic design of a Security Incident Mapping (SIM) web-based system. Respondents should not provide names or other personally identifying information about individuals involved in incidents.

Section A: Respondent Information

1. Which category best describes you?

- Student
- Staff
- Landlord/Hostel Owner

2. How long have you been associated with the campus community?

- Less than 1 year
- 1–2 years
- 3–4 years
- More than 4 years

Section B: Security Concerns

3. How would you rate the general security situation around the campus/community?

- 1 – Very Unsafe
- 2
- 3
- 4
- 5 – Very Safe

4. Which security concerns do you think are most common in the community?

- Theft
- Physical assault
- Sexual violence
- Unauthorized access/intrusion
- Vandalism
- Threats/intimidation
- Other

5. Have you ever experienced or witnessed a security incident within or around the campus/community?

- Yes
- No
- Prefer not to say

Section C: Incident Reporting

6. If you experienced or witnessed an incident, how was it reported?

- Security personnel
- School management
- Police/law enforcement
- Hostel/landlord
- Friend/colleague
- It was not reported
- Other

7. What challenges might prevent people from reporting security incidents?

- Fear of consequences
- Lack of knowledge about where to report
- Slow response
- Lack of trust
- Privacy concerns
- Reporting process is inconvenient
- Other

8. How useful would you find a web-based platform for reporting security incidents?

- 1 – Not useful
- 2
- 3
- 4
- 5 – Very useful

Section D: SIM System Requirements

9. What features should a Security Incident Mapping system provide?

- Quick incident reporting
- Location of incident
- Date and time of incident
- Incident category
- Description of incident
- Anonymous/confidential reporting
- Status tracking
- Emergency contact information
- Security response updates
- Other

10. How important is it for users to report incidents without publicly revealing their identity?

- 1 – Not important
- 2
- 3
- 4
- 5 – Very important

11. Would you use a SIM system if it were available on campus?

- Yes
- No
- Maybe

12. What suggestion would you give for improving security incident reporting on campus?

- Open-ended response

Recommended Google Forms settings: Questions 1, 3, 5, 8, 9, 10 and 11 should be required. Keep responses open to anyone with the link so students, staff and landlords can participate.
